Personal Statement

I am a motivated Computer Science undergraduate with practical experience in software development, web technologies, database management, and IT support. Through academic projects, internship experience, leadership roles, and sports involvement, I have developed strong technical, problem-solving, teamwork, communication, and leadership skills, and I am eager to contribute to impactful technology-driven solutions.

Education

BSC (Hons) Computer Science

2022 September - 2026 September | Colombo, Sri Lanka

Informatics Institute of Technology affiliated with University of Westminster, UK.

Foundation Certificate in Higher Education

2021- 2022 | Colombo, Sri Lanka

Informatics Institute Of Technology, Colombo - Sri Lanka.

St. Joseph's College, Colombo 10

2008 - 2022 | Colombo, Sri Lanka

G.C.E. Advanced Level Examination - Mathematics Stream | 2021

G.C.E. Ordinary Level Examination | 2018

Projects

ChurnLens – Explainable Customer Churn Prediction Web Platform (www.churnlens.tech) | 2025 – 2026

- Developed an explainable customer churn prediction web platform as my Final Year Project, focused on helping organizations identify high-risk customers and support targeted retention decisions. Built using React, FastAPI, Python, scikit-learn, LightGBM, SHAP, and Pandas, the system supports multi-file data ingestion, churn prediction, probability calibration, SHAP-based reason generation, threshold evaluation, and Top-K customer export through an interactive dashboard.

SOS Flood Rescue (www.etickets.leoiit.org) | 2025

- Developed an SOS reporting and response web platform during the Ditwah Cyclone, enabling rapid assistance coordination and successfully raising over LKR 500,000 within one week.

E-Waste Management Web Application | 2024

- Developed a E-Waste Management web application as Software Development Group Project at Informatics Institute of Technology using HTML, CSS, MySQL, JavaScript.

Shopping Management System | 2024

- Developed a shopping management system using Java with OOP concepts, as a coursework at IIT where the user can add, update and delete products from the shopping cart, and calculate final total with discounts. The GUI of the shopping cart was implemented using Java Swing.

Theatre Booking System | 2023

- Developed a theater booking system using Java to manage and control the seats that have been sold and the seats that are still available for a movie theatre.

Innovative Solutions Group Project | 2022

- Successfully completed Designing an Innovative Solutions Group Project at IIT for E-Waste Management with a prototype.

University Grading System | 2022

- Developed a university grading system using Python where students are graded and are able to check whether they passed, referred or failed the module. The project includes lists, text file handling and dictionaries.

Achievements

- **Most Outstanding Club President - 1st Runners UP 2023/2024** | Leo District 306A1
- **Most Outstanding Club Immediate Past President - 1st Runners UP 2024/2025** | Leo District 306A1
